**Re: CR 25-13, Big Game Quotas for the 2025-2026 Seasons**

Dear Commissioners and Director Jenne:

On behalf of Safari Club International, I would like to thank you for the opportunity to comment on the proposed CR 25-13, Big Game Quotas for the 2025-2026 Seasons.

The proposed CR 25-13, Big Game Quotas for the 2025-2026 Seasons, generally demonstrates responsible and sustainable management of many different big game species while maintaining high levels of opportunity for hunters. SCI again commends and supports the Commission and the Department regarding the continuation of a moose hunting season, a conservation success story.

SCI believes that sound science-based conservation involving hunting as the primary management tool, while maximizing opportunities for all huntable species, such as moose, elk, pronghorn, mountain goat, and bighorn sheep, is necessary to the long-term health of wildlife. Hunters have long paid the way for conservation, both game and non-game wildlife, and maximizing opportunity for hunting is also key to long-term funding for all conservation. Hunting benefits wildlife conservation.

Thank you again for the opportunity to comment on the proposed CR 25-13, Big Game Quotas for the 2025-2026 Seasons. SCI is dedicated to protecting the freedom to hunt and we appreciate the continued partnership with the Department and the Commission. SCI is always first for hunters.

Sincerely,

W. Laird Hamberlin  
Chief Executive Officer  
Safari Club International
